At- Shiravli, Post Ransai, Khalapur, Raigad, Maharashtra, India  
Date of Birth: 30/04/2006 | Age: 20 Years

## SUMMARY

Motivated and detail-oriented B.Tech student currently pursuing Computer Science Engineering with strong interest in Java Development, Advanced Java, and Software Development. Passionate about building practical software applications and improving problem-solving skills.

## STRENGTHS

|                            |                                                                                                     |
|----------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Java Development</b>    | Strong understanding of Core Java, OOP concepts, and currently learning Advanced Java technologies. |
| <b>Problem Solving</b>     | Capable of analyzing problems logically and developing efficient software-based solutions.          |
| <b>Project Development</b> | Experienced in developing practical projects with focus on functionality and backend logic.         |
| <b>Communication</b>       | Good communication and teamwork skills with the ability to learn and adapt quickly.                 |

## PROJECTS

|                                                |                                                                                                                                                                                        |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Finance Tracker using Java</b>              | Developed a console-based Finance Tracker application using Java with features such as income and expense tracking, category management, transaction history, and balance calculation. |
| <b>Smart Parking System</b>                    | Designed a Smart Parking project focused on efficient parking slot management and reducing manual parking challenges.                                                                  |
| <b>Stock Details Chatbot for Swing Trading</b> | Developed a chatbot that provides stock-related information and assists users in selecting stocks for swing trading.                                                                   |

## SKILLS & SOFT SKILLS

**Technical Skills:** Java, Advanced Java (Learning), Object-Oriented Programming (OOP), Problem Solving, Basic SQL, Software Development, VS Code

**Soft Skills:** Analytical Thinking, Communication, Time Management, Teamwork, Adaptability, Quick Learning

## EDUCATION

**Bachelor of Technology (B.Tech)** – JSPM University, Pune  
Computer Science Engineering – Currently Pursuing (Second Year)

**Diploma in Computer Science** – Completed with 80%

**SSC / 10th** – Completed with 78%

## EXPERIENCE

Fresher seeking opportunities to apply programming knowledge and gain industry experience in software development and Java technologies.

## LANGUAGES

English, Hindi, Marathi
